The screenshot displays the Nikon NSR-S208D software interface. At the top, the main window shows the operator name 'FAB7AE' and the online mode 'Online/Local'. A log window on the right records system events such as 'Constants (MCSW - Machine Constant) changed' and 'Evaluation calculate -End'. A 'TagList file Version Check Form' dialog box is open in the foreground, containing a table with columns for component name, file create version, NSR version, and a 'judge' status. The table lists various components like 'mcsw', 'ocsw', 'body', 'bsac', 'chmb', 'gio', 'ilmn', 'lens', 'rldr', and 'wldr'. Below the table are buttons for 'List File Create' and 'Continue'. The background application window includes a 'Job Manager' section with a 'Queue Lock' button and a 'Job Menu' section with 'Processed' and 'Failed' buttons. On the right side of the background window, there are buttons for 'Order' and 'Delete', and a 'Submit. Time' column in a table.
